Mine dump truck BELAZ-75306
of payload capacity 220 tonnes

It's designed for transportation of rock mass in difficult mining and technical conditions of deep mines, at mineral deposit open pits on technological roads under various climatic operating conditions (at ambient temperature from -50 to +50 °C).

### Engine

<table>
<thead>
<tr>
<th>Model</th>
<th>CUMMINS QSK 60-C</th>

<td>Specific fuel consumption at rated power, g/kW hr</td>
<td>208</td>
</tr>
<tr>
<td>Air cleaning is performed by three-stage filter with dry-type elements. Engine exhaust expulsion is performed through body. Circulating lubrication system is pressurized and designed with &quot;wet&quot; sump. Double-loop fluid cooling system with forced circulation. Oil cooling is performed by oil-to-water heat exchanger. Cooling system impeller is actuated by fluid coupling with automatic control. Cooling system activation and desactivation is performed by means of thermostat. Starting system is actuated by pneumatic starter. Air pressure in starting system, MPa</td>
<td>0.6-0.8</td>

</tbody>
</table>

### Suspension

Suspension is conventional for front axle and driving axle and equipped with trailing arms, central joints and transversal rods. Cylinders are pneumohydraulic (nitrogen and oil) and equipped with inbuilt hydraulic shock absorber. Two cylinders are on the front axle and two cylinders are on the rear axle. Cylinder piston stroke, mm
- front: 320
- rear: 290

### Steering

Hydrostatic steering with steerable front wheels.
- Steering angle, degree: 39
- Turning radius, m: 15
- Overall turning diameter, m: 34
The steering meets ISO 5010 requirements.

### Brakes

Dump truck brake system meets ISO 3450 international safety regulations and requirements. The system is equipped with service, parking, auxiliary and emergency brake systems.
- **Service brake system** is disk brakes with four brake gears per disk for front wheels and disk brakes with two brake gears per disk and automatic gap adjustment for rear wheels. The disks are mounted on traction motor shafts, actuator is hydraulic and separate for front and rear wheels.
- **Parking brake system** is permanently closed system with two brake gears of rear wheels per disk, spring actuator and hydraulic control.
- **Auxiliary brake system** is electrodynamic braking by traction motors with forced air cooling of brake resistors.
- **Emergency brake system** uses parking brake and operable circuit of service brakes.
- **Brake resistors**
  - Power, kW: UVTR 2x600 - 2 units
  - 2400

### Transmission

Transmission is equipped with alternating current - direct current drive with traction alternator, two traction motors, motorized wheels planetary double-row reduction units, microprocessor-based control system and control devices, adjustment units.

| Transmission ratio | 27.5 |
| Maximum dump truck travel speed, km/h | 43 |

| Transmission | AC - DC |
| Traction alternator | SGT 1400-8 |
| Traction motor | DK-724 |
Body

Welded bucket-type body with FOPS safety system, protective canopy, engine exhaust heating, device for mechanical fixing in raised position, rock-fenders and rock-ejectors.

Body capacity, m³:

</tr>
</tbody>
</table>

Frame

Frame is welded of high-strength low-alloy steel with application of cast elements at the maximum loading points and equipped with box-section variable-height side-members interconnected by cross-members.

Hydraulic system

Hydraulic system is combined for body dumping gear, steering and brakes actuator. The system is equipped with two-stage variable-displacement axial-piston oil pump and three-stage telescopic body lifting cylinders with one stage of double action.

Body lifting time, s | 22
Body lowering time, s | 33
Maximum pressure in hydraulic system, MPa | 18
Maximum pump delivery @ 1900 rpm, dm³/min | 688
Filtering degree, μm | 10

Cab

Two-man two-door cab is equipped with air-sprung adjustable driver seat, additional trainee seat and adjustable steering column. The cab meets EN 474-1 and EN 474-6 requirements that specify permissible levels of in-cab noise, vibration, content of hazardous substances and dust. Driver's workplace meets ROPS safety requirements.

In-cab noise level is not more than 80 dB(A).
Local vibration level is not more than 126 dB(A).
Overall vibration level is not more than 115 dB(A).

Tires

Radial or diagonal tubeless air tires with quarry tread pattern.

*Overall dimensions are specified for basic kitting-up of the dump truck

Fuel tank | 2900
Engine cooling system | 650
Engine lubrication system | 240
Hydraulic system | 790
Reduction units of motorized wheels | 210 (105x2)
Suspension cylinders:
- front | 97,4 (48,7x2)
- rear | 103,0 (51,5x2)

Maximum payload capacity, kg | 220000
Unladen weight, kg | 156100
Gross weight, kg | 376100

Tow truck weight distribution on axles, %:
- unladen
  - front | 45
  - rear | 55
- laden
  - front | 33
  - rear | 67

Fire-fighting system (standard)
Starting preheater (standard)
Heating and conditioning unit (standard)
Automatic lubrication system (optional)
System of loading and fuel control (optional)
Telemetering tire-pressure monitoring system (optional)
Body floor lining (optional)
Attention device of approach to high-voltage line (optional)
Engine exhaust expulsion through mufflers (optional)

Overall dimensions are specified for basic kitting-up of the dump truck
